What is Shelter Coin v3?

The Shelter Coin Project was founded to help fight for all those experiencing homelessness worldwide. Shelter Coin (\$SHELTERv3) is a 100% community-driven, hyper deflationary, auto-staking utility token with triple reflections and several hard-coded safety controls built into the Smart Contract to protect holders from scams. SHELTERv3 self-generates liquidity and auto-locks for 10 years to maintain a stable price floor while providing holders with 5 Tiers of increasing (10%-20%) passive income in \$BUSD, \$SHIB, and \$LIBERO. Simply hold \$SHELTERv3 and earn diversified passive income with every transaction while simultaneously contributing to end the homelessness pandemic!
